

CLAIMS

What is claimed is:

1. A line and reel fishing system Chum Tube Lure comprising:
chum tube means to load and hold fish oil attractant for a controlled release of the fish oil attractant;
means, coupled to said chum tube means for trolling deeper;
means, coupled to output of said chum tube means for rotating the lure and receiving fish oil attractant over the lure.
2. The line and reel fishing system Chum Tube Lure as recited in claim 1 wherein:
said chum tube means comprises lead head means with a hole for loading fish oil attractant.
3. The line and reel fishing system Chum Tube Lure as recited in claim 2 wherein:
said lead head means with said hole angled up from the front to back provides a deeper depth at which the Chum Tube Lure is trolled.
4. The line and reel fishing system Chum Tube Lure as recited in claim 2 wherein:
said lead head means comprises an eye at the front and top to keep said chum tube means upright when trolled.
5. The line and reel fishing system Chum Tube Lure as recited in claim 1 wherein:
said chum tube means comprises three-inch long piece of manila rope to absorb and control the release of the fish oil attractant.
6. The line and reel fishing system Chum Tube Lure as recited in claim 1 wherein:
said chum tube means comprises a $\frac{3}{4}$ inch wood dowel with an offset hole to seal the back end of the chum tube and also controls the release of the fish oil attractant.
7. The line and reel fishing system Chum Tube Lure as recited in claim 2 wherein:
said wood dowel means with the offset hole cause said lure to swing erratically.
8. The line and reel fishing system Chum Tube Lure as recited in claim 1 wherein:
said lure means comprises a barrel swivel for rotating the said lure.
